

## Shuffle the name

Your task is to write a method that accepts a string (of a person's first and last name) and returns a string with the first and last name swapped.

### Notes

There will be exactly one space between the first and last name.

### Input

The first line of input contains a person's first and last name.

### Output

The first line contains the first and last name swapped.

### Sample input

### Sample output

Rosie O'Donnell	O'Donnell Rosie
Seymour Butts	Butts Seymour
