

## Parallelepiped

A programmer wrote this simple program. This is used to calculate area and volume of a parallelepiped. Unfortunately the program does not compile!  
Can you spot the bug and select the line where there is an error?

### Input

The first line contains a len of parallelepipeds.  
The second line contains the width of parallelepipeds.  
The third line contains the height of parallelepipeds.

### Output

The first line contains the total area.  
The second line contains the volume.

### Sample input

### Sample output

34 5 32	2836,00 5440,00
2 32 2	264,00 128,00
4 4 4	96,00 64,00
