

## Repdigit

A repdigit is a positive number composed out of the same digit.

Your task is to write a function that takes an integer and returns whether it's a repdigit or not.

### Note

The number 0 should return True (even though it's not a positive number).

### Input

The first line of input contains the number.

### Output

The first line displays “true” or “false”.

### Sample input

### Sample output

66	true
0	true
-11	false
